EXPERIENCE

Software Developer

May 2024 – Present

Nural

- **Architected and developed dynamic user interfaces** with **React.js**, leveraging state management and reusable components to achieve a **30% improvement in user engagement metrics**.
- **Designed and implemented scalable RESTful APIs** using **Node.js** and **Express.js**, resulting in a **25% reduction in response times** and enhanced backend performance.
- **Spearheaded Agile development practices**, driving **efficient sprint planning**, facilitating **comprehensive code reviews**, and ensuring seamless deployment through **CI/CD pipelines**, delivering high-impact solutions aligned with business goals.

PROJECTS

Study Notion [Live Demo](#) | [Github](#) | [TailwindCSS](#), [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#).

- **Coordinated the development of StudyNotion**, an ed-tech platform supporting the creation, interaction with, and evaluation of educational content via CRUD functionalities.
- **Enhanced platform reliability** by implementing robust access control measures, with the capacity to manage up to 1,000 simulated users.
- **Streamlined course workflows** and tailored dashboards, reducing task completion time for hypothetical users by 40%.
- **Achieved seamless scalability** through a modular MERN stack architecture, capable of processing over 10,000 database operations during testing.

GPSTracker [Live Demo](#) | [TailwindCSS](#), [Angular](#), [Node.js](#), [Express.js](#), [MongoDB](#).

- **Engineered backend architecture** for a real-time vehicle tracking system, ensuring consistent and precise updates with **Node.js** and **Express.js**.
- **Enhanced MongoDB schema designs**, enabling efficient management of extensive location data, capable of handling over 50,000 data points during testing.
- **Devised and integrated RESTful APIs**, optimizing data transfer speed and reducing update latency by 30%, ensuring a responsive user experience.
- **Collaborated within a team of three**, focusing on robust backend development while maintaining scalability and system reliability for future growth.

FreeLansters [Github](#) | [TailwindCSS](#), [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#).

- **Constructed backend services** for a dynamic vehicle tracking system, leveraging **Node.js** and **Express.js** for real-time data processing.
- **Refined MongoDB schema architecture** to efficiently store and retrieve location data, supporting up to 50,000 simulated data points.
- **Developed and optimized RESTful APIs**, enhancing data synchronization and improving update latency by 30% for seamless user interaction.

EDUCATION

National Institute of Technology Jamshedpur

2021 – 2024

Master of Computer Application

7.5 CGPA

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript

Web Development: HTML, CSS, TailwindCSS, React.js, Redux, Node.js, Express.js, MongoDB, Redis

Tools Platforms: Git, GitHub, Sublime Text, Visual Studio Code, Postman

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, OOPs

ACHIEVEMENTS AND CERTIFICATIONS

- Secured All India Rank of **498** in NIMCET 2021 National Level MCA Entrance Examination.
- Solved more than **600+** problems on platform [GeeksforGeeks](#) and [LeetCode](#).
- Achieved **5*** in C++, Python, SQL and problem solving on [Hackerrank](#).
